**Southeast Toyota Distributors, LLC (SET) filed a Defect Information Report (DIR) with the National Highway Traffic Safety Administration (NHTSA) initiating a voluntary Safety Recall on certain 2016 Toyota Camry, 2016 Toyota Highlander, 2015-2016 Toyota Tundra, 2015-2016 Scion FR-S, and 2015-2016 Scion tC vehicles.**

**Affected Vehicles:**

2016 Toyota Camry, 2016 Toyota Highlander, 2015-2016 Toyota Tundra, 2015-2016 Scion FR-S, and 2015-2016 Scion tC vehicles that have been accessorized by Southeast Toyota Distributors, LLC.

**Condition:**

Pursuant to FMVSS 110 S10, a load carrying capacity modification label must be added to a vehicle if weight exceeding the lesser of 1.5 percent of GVWR or 45.4 kg (100 pounds) is added to a vehicle between final vehicle certification and the first retail sale of the vehicle, and the corrected values must be accurate to within 1 percent of the actual added weight. With regard to the vehicles that are subject to this recall, SET added net accessory weight in excess of the 1.5 percent/100 lbs and provided the requisite load carrying capacity modification label, but SET has determined that certain labels were not accurate to within 1 percent of the actual added weight.

**Remedy:**

SET will notify the customers by mail of the noncompliance and will provide them with a label to be installed over the inaccurate label. Each label will be generated specifically for each customer's vehicle, based on the net weight of the accessories installed.

**This following information is being provided to keep you informed of the filing and your degree of involvement.**

SET has completed remedy preparations and will begin to notify owners in July 2016.

In addition, 49 Code of Federal Regulations §577.13 requires us to provide the following advisory: it is a violation of Federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification under a sale or lease until the defect or noncompliance is remedied.
